## F KCSL Research: Trend is Friend

KCSL Research is introducing a new technical report. If you believe trend is your friend, and prefer not to trade against the trend then the signals generated are for you. If you choose to trade against the depicted trend, you are a counter trend trader. There is usually more risk associated with trading against the trend.

### What is the Report?

3x and 6x levels are the moving average of previous 3 and 6 days pivots.

The report is calculated based on end of the day data. We are comparing previous day's close with 3x & 6x to determine the trend. The report may not be effective for live intraday trades.

RSI is technical momentum indicator that compares the magnitude of recent gains to recent losses in an attempt to determine overbought and oversold conditions of an asset. It is possible that a commodity continues to rally/decline even after RSI has given a signal of overbought/oversold. #N/A in the report implies No Action to be taken.
